Subject: Application for ML Intern Position

Dear Hiring Manager,

I am writing to apply for the ML Intern position at Tower Research Capital. As a final-year Computer Science student at Parul University, I have gained hands-on experience with LLMs and generative AI models, developing a strong passion for AI-driven solutions despite being early in my career.

While I am a fresher, my academic projects and self-driven learning have equipped me with skills in building and fine-tuning LLM-based NLP models. I am proficient in Python and have an understanding of CI/CD concepts. I am eager to bring my enthusiasm, quick learning ability, and commitment to contributing to your Core AI & Machine Learning team.

I am excited about the opportunity to grow at Tower Research Capital, and I look forward to discussing how my skills and fresh perspective can add value to your team.

Thank you for considering my application.

Sincerely,

Shashank Gunda
